

# Analyst's Workstation 8

THE COMPREHENSIVE ANALYSIS SOLUTION

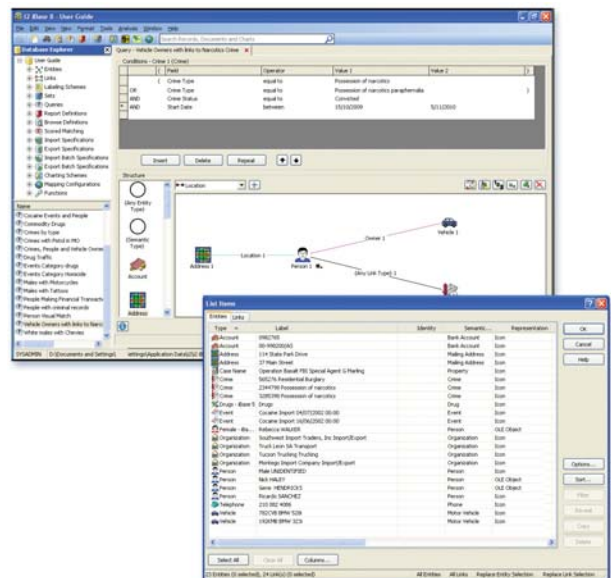

Accelerating Your Mission.

*Analyst's Workstation 8* is the ultimate toolkit for analysis; an integrated suite of visual analysis and database applications that reveal relationships, patterns and trends in data and simplify the creation and dissemination of actionable intelligence products to support intelligence-led operations.

*Analyst's Workstation 8* provides the ideal environment for intelligence-led organisations to prepare analytical and intelligence products while enabling users to understand relationships, patterns and trends in data easily overlooked when data is scattered across multiple systems. By combining the easy creation of summary statistics or graphics with tactical analysis capabilities, users can instantly drill-down on the details of relationships and patterns for detailed analysis.

*Analyst's Workstation 8* tightly integrates *iBase*, *Data Miner* and *iBase GIS Interfaces* with the industry leading *Analyst's Notebook* freeing users to concentrate on analysis rather than moving data between separate applications. The customisable commercial off the shelf software approach delivers complete flexibility with unmatched speed of deployment.

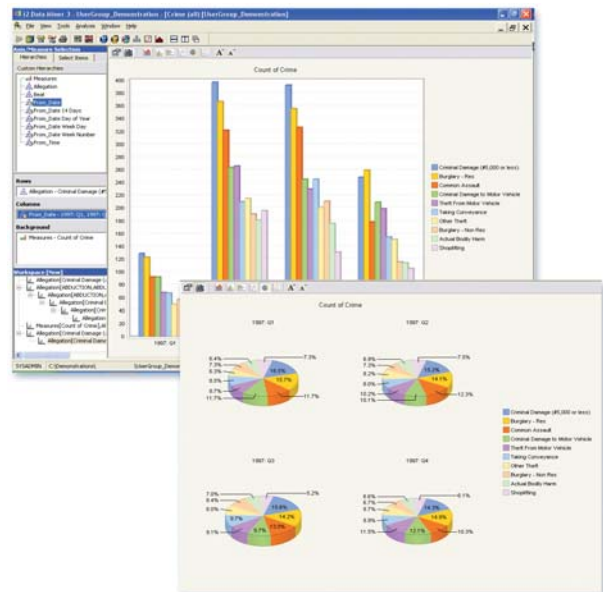

*Analyst's Workstation 8* is the fastest way to create actionable intelligence products, including summary statistics, graphics and association charts to support intelligence-led operations, and CompStat processes.

Use *iBase* to search volumes of data to automatically chart in *Analyst's Notebook*

## Speed up the analytical process

- Identify relationships, patterns and trends more easily
- Speed up the analytical process using a single analytical environment
- Reduce time spent on repetitive tasks and free up analysts' time for in-depth analysis

Use *Data Miner* to drill-down on statistics to explore patterns and trends

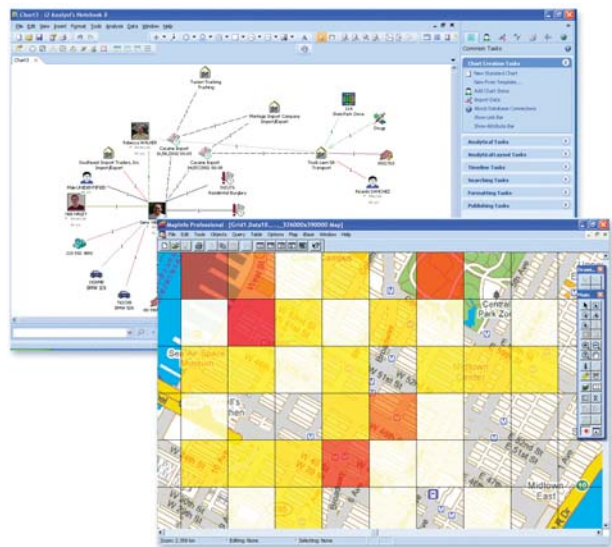

## Unlock the value of your data

- Save time by accessing an analysis-ready data store
- Always have the right tool on hand to seamlessly switch between analysing trends, data patterns, spatial patterns or associations in your data
- Identify connections and patterns in the information that may otherwise have been missed by combining structured data from *iBase* with information in *Analyst's Notebook* charts
- Understand social network dynamics and quickly identify key players in large networks

## Cost effective and flexible deployment

- Low start-up costs with rapid out-of-the-box deployment
- Seamlessly integrates with existing infrastructure and security lowering total cost of ownership
- Modify and customise your system without requiring external resources

Save time by  
accessing an analysis-  
ready data store.

*GIS Interface – provides location-based analysis of intelligence data*

### **Analyst's Workstation 8 key capabilities**

- Automatically tracks steps taken in the analytical process, which can be saved for reuse, organised into folders and easily shared with other users
- Collect and store volumes of incident data in an *iBase* database as entities and links ready for analysis. Includes options for automatic import and ingestion of data from external systems or manual import or entry
- Query Analysis: Powerful visual query tool allows users to “draw” complex queries without having to understand SQL or proprietary query languages
- Spatial Analysis: Interfaces to leading GIS packages, including ESRI and MapInfo for spatial analysis
- Social Network Analysis: Embedded SNA algorithms including Centrality that can leverage link weightings for more accurate results
